**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 is rejected under 35 U.S.C. 102(b) as being anticipated by Michalak(5835006).

Michalak discloses in fig. 3-4: a motor unit having a pair of electrode (400,402), a cylindrical case (308) for covering and securing the motor unit. Wherein, the cylindrical case comprising a first conductor portion (300) which is electrically connected to one of the electrode terminal (402) wherein the cylindrical case further comprising a second conductor portion (302) which is located on the end surface of the case and electrically separated from the first cylindrical portion and connected to the other electrode terminal (400).

3. Claim is 8-12,16,19,20,22 and 24 rejected under 35 U.S.C. 102(b) as being anticipated by Michalak (5835006).

Michalak discloses in fig, 3 and 4: a motor (300) comprising a rotor unit having a pair of electrode terminals (402,400) and a cylindrical case covering (308). Wherein, the case comprises a first cylindrical conductor portion (302) which is electrically connected to one of the electrode terminal, a battery (124) for driving the motor wherein the cylindrical portion connected to one of the electrode terminals and the other electrode terminals are connected to one of the electrode of the battery through conductor

member respectively. Wherein, the case further comprises a second conductor portion (310) which is electrically separated from the first cylindrical conductor (302) and connected to the other electrode terminal (402) and the second conductor portion is connected to a corresponding electrode (400) of the battery (124) through a conductor member when at least one of the conductor members are brought into contact with or away from the battery or the motor. Wherein, the second conductive portion is located on an end surface of the case (204) other than the cylindrical conductive portion of the case.

4. Claim ~~25~~ rejected under 35 U.S.C. 102(b) as being anticipated by Michalak (5835006).

Michalak discloses in fig. 3-4: a rotor (302) with a first electrical terminal (400) at a first end and a second electrical (402) terminal at a second end; and a cylindrical case (308) for covering and securing the motor unit, with a first cylindrical conductive portion connected to the first electrical terminal.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 14-~~16~~, 17, 18, 21, 23 and 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Michalak (5835009) in view of Mabuchi (5343102).

Art Unit: 2834

Michalak disclose in 3-4 substantially the claimed invention. However, Michalak does not show a commutator and contact spring, a small case body comprising recess portions for positioning the motor.

Mabuchi disclose in fig.8-9 a commutator (37) comprising a contact spring (23) and a small case (10) body comprising recess (27) for positioning the motor. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention to modify the motor of Michalak with the communicator and small case to ensure a stable electrical connection.

### ***Response to Arguments***

6. Applicant's arguments with respect to claim 1, 3, 6, 8-12, 14, 16-26 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
